

Managing B2B DTC FBM Orders through Shippo

Use Shippo to connect marketplaces and carriers, allowing TTL to access incoming orders, manage shipping activity, and support fulfillment through authorized client account access.

- [Getting started with Shippo](#)

Getting started with Shippo

Objective

Set up a Shippo account, connect the required online stores or marketplaces, upgrade to the appropriate Pro plan, and grant The Three Logistics (TTL) secondary user access. Completing these steps allows TTL to access connected sales channels through Shippo, review incoming orders, and support the shipping and fulfillment process using authorized account access.

Getting Started

To get started, go to shippo.com and create an account with a Professional plan subscription. Shippo Pro Plans start at \$19 per month and include multiple user logins. Current pricing and plan details can be reviewed here: <https://goshippo.com/pricing/>

First, set up your Shippo account to fulfill individual orders

1. Log in to your Shippo account.
2. Click Settings in the right navigation panel.
3. Click Stores.
4. Click Connect Store.

5. Choose your marketplace. For example, Shopify.

6. Enter your Shopify store URL, then click Continue.

The process is similar for each marketplace. Choose the marketplace you would like to connect from the Settings menu and follow the prompts provided by Shippo.

Please make sure a payment method is added to your Shippo account so shipping labels can be purchased when orders are ready to ship.

Next, add The Three Logistics as an additional user in your Shippo account

1. Open the Settings tab and click Users.
2. Click Add User from the top-right side of the user management page.

3. Enter the email address assigned to your business. The format will be logistics plus your short business name at the TTL domain. Example format: logistics+[ShortBusinessName]@thethreelogistics.com. Replace [ShortBusinessName] with your company name.

A screenshot of a web application dialog box titled "Add New User". The dialog has a close button (X) in the top right corner. Below the title, there is a label "Email" followed by a text input field containing the email address "logistics+MyCompany@thethreelogistics.com". At the bottom of the dialog, there are two buttons: "Cancel" on the left and "Send Invite" on the right. The "Send Invite" button is highlighted in green.

Add New User

Email

logistics+MyCompany@thethreelogistics.com

Cancel Send Invite

4. Click Send Invite. TTL will receive the invitation and complete the user access setup. The user may appear as Pending until setup is completed on our end.
